

SPRINT 2

MEETING 1

To start off the meeting, we discussed about the functionalities that we didn't implement last sprint and the new ones that we need to develop for this version.

Afterwards we assigned the work for each member, Manuel will update the previous functionalities, Borja will implement some of the new functions of Issues, and the other functions will of Issues will be implemented by Marcos and lastly Anzi and Ping will update the database model and implement the login function that wasn't implemented last time.
